The WHY ...

@TeacherToolkit

@TeacherToolkit

Research suggests teachers pose up to **XX** number of questions in a typical school day.
How many do you think?

@TeacherToolkit

300 to 400!

1. What **TYPES** of questions are asked?
2. Are all questions effective?

@TeacherToolkit

Teachers' Perceptions + Practice

Teachers use questions to **CHECK**:

1. Whether students understand
2. What is being taught,
3. Whether instruction is effective.

Guide To
Effective questioning

Teacher questions that prompt answer opportunities are 82 per cent of the one school day. (Stevens, 1972) Teacher trained to improve their questioning skills, where should we start with the instructional tool used in the classroom?

One way in which questioning can be used to use formative questions. When students self-questioning techniques through scaffolding instruction, and metacognitive empowerment. (Good, 2004) (Good, 2004)

How can teachers reach higher order?

What would a metacognitive discussion be designed to do?

How is this most effective for particular teaching, including statements and self-reflection and taking about questions.

When is received? No understanding

Effective questioning can be used to build a culture of effective questioning across a school organisation. Effective professional development requires the use of regular and targeted feedback.

Why do we pose questions?

1. to clarify
2. to challenge assumption
3. for retrieval; to gather viewpoints
4. to predict what we need to re-teach.

Guide To Questioning

Questioning Techniques

Teacher questions / Student answer opportunities 80 per cent of the way school day (Dewey, 1912). Teacher began to measure that questioning is so, where should we start with the most structured tool used in the classroom?

Questioning and Metacognition

One way in which questioning can be used to build metacognition is through self-questioning techniques through questioning reflection, and feedback employment. (Shulz, 2018)

Effective Questioning Practices

When would you start if you wanted to build a culture of effective questioning within a school organization? Effective professional development requires the use of regular and targeted feedback...

How can teachers track their own?

What would a metacognition discussion be design a tool?

A question with a task designed to answer it...

- How many packets are there on a snooker table?
- Why does the Earth rotate through night and day?
- What would happen if an empty coffee cup fell off from a table onto the floor?
- What happens to the water in a bathroom sink when you place your hand into it?
- Can you walk from London to Berlin?

Thesis Questioning

@TeacherToolkit

A closed form of question...

- Who did the Romans fight with?
- Should Britain have left Europe?
- Is 3.2 an odd or an even number?
- Is 'misinformation' a made up theory?
- What is gravity?

Meta Questioning

@TeacherToolkit

Philosophical concepts which lead to further questions...

- Is breathing clean air for free?
- Why is an Orange named by the colour orange, but a Banana not named yellow?
- Did the chicken or the egg come first?
- Did the tin or the tin opener come first?
- Does this question make sense?

Start, Set, Research Questioning

@TeacherToolkit

A question designed to begin or end lessons (and not necessarily the key focus)...

1.	To kickstart a debate...	
2.	To help provoke students' thoughts as they leave the classroom.	
3.	Posed to elicit enquiry during or after the lesson...	
4.	Can be anecdotal.	
5.	One example: What are reasons why President Donald Trump did not turn up to Biden's inauguration?

Empirical Questioning

@TeacherToolkit

A question for checking facts...

1.	How many biro pens are in this room? (Direct experience)	
2.	How many moons does Jupiter have? (Descriptive)	
3.	Is Pluto round? (Indirect experience)	
4.	Is a Panda bear more black or white in colour? (Factual)	
5.	Do Gremlins exist? (Open empirical)

Multiple Choice Questioning

@TeacherToolkit

A leading question designed to elicit retrieval from memory...

1.	Good for setting an agenda	
2.	To suggest the things students may not ask themselves	
3.	You can hide the options before revealing the choices	
4.	Obvious (or silly) incorrect options reduce the difficulty	
5.	Scope to include two possibilities for discussion

138

Explicit/Implicit Questioning

@TeacherToolkit

Implicit questions are open-ended, where as **Explicit** questions are closed...

1.	Implicit: What is a letter?	
2.	Explicit: Is 'A' a letter?	
3.	Implicit: What is Bhangra music?	
4.	Explicit: Is this (insert sound) Bhangra music?	
5.	Implicit: What is a teacher?	
6.	Explicit: Is Ross McGill a teacher?

يزداد المستوى العام لصعوبة السؤال ... "ما هو؟" عادة ما يكون إنشاء السؤال والإجابة عليه أسهل من إنشاء سؤال "كيف يمكن؟" سؤال.

To what extent does VF implemented for 2 terms improve student engagement amongst disadvantaged pupils in years 7, 8 and 10?

UCL Verbal Feedback Project Report 2019

Using an impact framework ...

What do we want to know? → What will positive change look like?

How do we collect evidence systematically and sustainably? ← What is our 'best current practice'?

What will we have to produce at the end?
